REVISION OF FEASIBILITY AND SUITABILITY STUDIES OF EXISTING NATIONAL HISTORIC TRAILS

JUNE 26, 2007.—Ordered to be printed

Mr. BINGAMAN, from the Committee on Energy and Natural
Resources, submitted the following

R E P O R T

[To accompany S. 580]

The Committee on the Energy and Natural Resources, to which was referred the bill (S. 580), to amend the National Trails System Act to require the Secretary of the Interior to update the feasibility and suitability studies of four national historic trails, and for other purposes, having considered the same, reports favorably thereon without amendment, and recommends that the bill do pass.

PURPOSE OF THE MEASURE

The purpose of S. 580 is to amend the National Trails System Act to authorize the Secretary of the Interior to update the feasibility and suitability studies of four National Historic Trails.

BACKGROUND AND NEED

The National Trails System Act (16 U.S.C. 1241 et seq.) authorizes the establishment of National Scenic, Historic and Recreation trails. S. 580 would amend that Act to authorize studies of additional routes for four prominent National Historic Trails: the Oregon National Historic Trail, a primary route for emigrants to the West; the Mormon Pioneer National Historic Trail, which commemorates the 1846-47 journey of Mormon settlers from Illinois to Utah; the California National Historic Trail, which traces access routes to the 1849 California Gold Rush; and the Pony Express National Historic Trail, which commemorates the eighteen-month running of the Pony Express and its dashing delivery of mail from Missouri to California in ten days.

Congress designated the Oregon and Mormon trails as components of the National Trails System in 1978 and the California and Pony Express trails in 1992. More recently, dozens of additional routes and cutoffs have been identified which may qualify as integral parts of these trails. Rather than following a single mainline route, the pioneers often followed a system of trails, braided to follow water and grass, avoid conflicts, save time, and even access additional sites.

S. 580 is necessary because the National Trails System Act does not provide for additions to trails subsequent to their designation by Congress. The bill would authorize the Secretary of the Interior to study the feasibility and suitability of adding new routes to each of these trails. Any designation of these new routes as components of the National Trails System would require subsequent legislation.

The Oregon, Mormon Pioneer, California, and Pony Express trails overlap one another in many locations and several of the routes and cutoffs proposed for study in S. 580 are already part of one or another of the designated trails. These shared routes are prominent where the trails depart from various points along the Missouri River, and other shared locations include routes in western Nebraska, Kansas, Colorado, Wyoming, Idaho, Nevada, and California. The study of these additional routes and cutoffs will help assure greater historical accuracy along these routes.

LEGISLATIVE HISTORY

S. 580 was introduced by Senator Hatch on February 14, 2007. Senator Bennett was added as a cosponsor on March 22, 2007. During the 109th Congress, the Committee considered similar legislation, S. 54, also sponsored by Senator Hatch. The Committee ordered S. 54 to be favorably reported on February 16, 2005 (S. Rept. 109-44), and the bill passed the Senate by unanimous consent on July 26, 2005.

During the 108th Congress, the Committee considered a similar bill, S. 635. The Subcommittee on National Parks held a hearing on S. 635 on May 6, 2003 (S. Hrg. 108-47). S. 635 was ordered reported, with amendments, by a voice vote on June 9, 2003 (S. Rept. 108-64), and passed the Senate by unanimous consent on June 16, 2003. The House of Representatives did not consider the bill prior to the *sine die* adjournment of the 108th Congress.

Similar legislation, H.R. 37, was sponsored by Representative Bereuter in the 107th Congress and passed the House on June 6, 2001, by a voice vote. Companion legislation, S. 213, was introduced by Senator Hatch and others on January 30, 2001. The Subcommittee on National Parks held a hearing on both bills on March 7, 2002 (S. Hrg. 107-522). At its business meeting on July 31, 2002, the Committee on Energy and Natural Resources ordered H.R. 37 to be favorably reported, as amended (S. Rept. 107-259). H.R. 37 passed the Senate by a voice vote on November 19, 2003, but was not considered by the House prior to the *sine die* adjournment of the 108th Congress.

COMMITTEE RECOMMENDATION

The Senate Committee on Energy and Natural Resources, in an open business session on May 23, 2007, by a unanimous voice vote of a quorum present, recommends that the Senate pass S. 580.

SUMMARY OF THE MEASURE

S. 580 amends section 5 of the National Trails System Act (16 U.S.C. 1244) to add a new subsection (g). The new subsection directs the Secretary of the Interior to revise the feasibility and suitability studies for the Oregon National Historic Trail, the Pony Express National Historic Trail, the California National Historic Trail and the Mormon Pioneer National Historic Trail, along with shared routes between the California and Oregon trails, for consideration of possible additions to the trails. The studies are to be completed and submitted to Congress not later than 3 fiscal years from the date funds are made available for the study.

COST AND BUDGETARY CONSIDERATIONS

The following estimate of the cost of this measure has been provided by the Congressional Budget Office:

MAY 30, 2007.

Hon. JEFF BINGAMAN,
Chairman, Committee on Energy and Natural Resources,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for S. 580, a bill to amend the National Trails System Act to require the Secretary of the Interior to update the feasibility and suitability studies of four national historic trails.

If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contact is Deborah Reis.

Sincerely,

PETER R. ORSZAG.

Enclosure.

S. 580—A bill to amend the National Trails System Act to require the Secretary of the Interior to update the feasibility and suitability studies of four national historic trails

S. 580 would direct the Department of the Interior to update the feasibility studies of four national historic trails to include numerous shared routes, cutoff trails, and other trail segments. (The four trails affected are the Oregon, Pony Express, California, and Mormon Pioneer National Historic Trails.) The bill would require the department to report its findings on the potential trail additions within three years of receiving funding for the studies.

Assuming the availability of appropriated funds, CBO estimates that it would cost \$160,000 over the next three years to conduct all of the required studies of trail segments specified by the bill. Enacting the legislation would not affect direct spending or revenues.

S. 580 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would impose no costs on state, local, or tribal governments.

The CBO staff contact for this estimate is Deborah Reis. The estimate was approved by Peter H. Fontaine, Deputy Assistant Director for Budget Analysis.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 580. The bill is not a regulatory measure in the sense of imposing Government-established standards or significant economic responsibilities on private individuals and businesses.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little, if any, additional paperwork would result from the enactment of S. 580, as ordered reported.

EXECUTIVE COMMUNICATIONS

The testimony provided by the National Park Service on S. 580 at the April 26, 2007 hearing on S. 580 follows:

STATEMENT OF DANIEL N. WENK, DEPUTY DIRECTOR,
NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

Mr. Chairman, thank you for the opportunity to present the Department of the Interior's views on S. 580, a bill to amend the National Trails System Act to update the feasibility and suitability studies of the Oregon, Pony Express, California, and Mormon Pioneer National Historic Trails (NHTs).

The Department supports S. 580, which is similar to legislation the Department supported during the 108th Congress. While the Department supports the authorization of these studies, we also believe that any funding requested should be directed first toward completing previously authorized studies.

S. 580 would update the feasibility and suitability studies and make recommendations through the examination of additional routes and cutoffs not included in the initial studies of all four trails. The Secretary of the Interior would determine if any of these routes and cutoffs are eligible as additions to the four NHTs at the completion of these studies and report back to the Congress on those deemed appropriate for addition to the trails.

The feasibility study for the Oregon NHT was completed in 1977, the study for the Mormon Pioneer NHT in 1978, and the one for the California and Pony Express NHTs in 1987. Since those studies have been completed, additional routes and cutoffs were identified that may qualify as segments of these trails. The National Trails System Act does not provide the authority to evaluate and add additional routes and cutoffs without certain legislative amendments.

The Oregon NHT, authorized in 1978, commemorates the "primary route" used by emigrants beginning in 1841 between Independence, Missouri and Oregon City, Oregon. Traveled by thousands, the trail contained routes and cut-

offs used through the years. These secondary routes had substantial emigrant traffic over several decades that demonstrate historical significance and may be worthy of examination in an updated study.

The authorization of the Mormon NHT in 1978 commemorates the journey of the pioneer party in 1846–1847 from Nauvoo, Illinois, to Salt Lake City, Utah. As with the Oregon NHT, emigrant traffic occurred on many additional routes during the Mormon migration westward. As with the other trails, these routes frequently coincide with one another. Preliminary data indicate significant historic traffic along many of these routes.

Authorized in 1992, the California NHT commemorates the gold rush to the Sierra Nevada. Dozens of routes and cutoffs were traveled by thousands of pioneers, but no single route dominated.

The Pony Express NHT was included in the same authorizing legislation as the California NHT. It commemorates the efforts of this nation struggling to establish a system of communication across the Trans-Missouri west. The trail primarily follows routes beginning at St. Joseph, Missouri and ending in San Francisco, California. The firm of Russell, Majors, and Waddell, a Missouri freighting company, established and operated the Pony Express for one and a half years before it fell on hard times and ceased to exist. A short section of the trail, from the Missouri River into Kansas, may be worthy of study and is included in S. 580.

All four trails overlap one another in many locations and several of the routes and cutoffs proposed for study in S. 580 are already part of designated trails. These shared routes are prominent where the trails depart from various points along the Missouri and Mississippi Rivers, particularly in the Kansas City, St. Joseph, Nebraska City, Council Bluffs and Omaha areas. Several other shared locations include routes in western Nebraska, Kansas, Colorado, Wyoming, Idaho, Nevada and California.

The National Trail System Act requires that studies of lands proposed for trails be made in consultation with Federal, State, and local agencies, as well as nonprofit trail organizations. Between 1994 and 1999, the National Park Service—in collaboration with the Bureau of Land Management, USDA Forest Service, trail advocacy groups and others—completed the Comprehensive Management and Use Plan and Environmental Impact Statement (1999) for the four trails. This was the initial plan for the recently established California and Pony Express NHTs as well as revised plans for the earlier established Oregon and Mormon Pioneer NHTs. S. 580 would allow for the consideration of these additional alternates and cutoffs by authorizing an update of the original studies done for these four trails to evaluate which are eligible for designation as NHT segments. S. 580 maintains the requirements of the National Trail System Act to work closely with Federal agencies, State, local and tribal governments, local land-

owners and other interested parties. We anticipate the cost of updating these studies to be approximately \$300,000.

The intent of the National Trails System Act is one of respecting private property rights. Given that historic trails cross public and private lands, the development of strong partnerships is critical to administering and managing the historic trails and achieving preservation of trail resources and interpretation of the trail to the public. The four national trails in this legislation demonstrate existing public and private partnerships.

This concludes my testimony. I would be happy to respond to any questions that you or members of the subcommittee may have.
